

Preventing Food Waste in School Canteens: European Projects in Motion

Practical experiences in measurement, education, gastronomy and behavioural change

Online webinar in English

GUSTOS

Objective

Knowledge and experiences exchange among European projects and organisations working to prevent food waste in school canteens.

Speakers will share methodologies, tested interventions, results and lessons learned across four areas: food waste measurement, educational interventions, gastronomic interventions, knowledge transfer and behavioural change.

Participants

Catering companies, schools, researcher and education communities, food professionals, public authorities, civil society, and any other organisation and stakeholder aiming to prevent and reduce food waste prevention in school canteens.

Expected outcomes

Enhance cooperation and collaboration among European projects.
Mutual learning among key stakeholders interested in food waste prevention.
Share best practices and lessons learned to reduce food waste in school canteens.
Promote solutions that can be replicated and implemented in other school canteens.
